

**An excellent quality level
as good as the new product**

This is possible with

**POTAIN GENUINE
STANDARD EXCHANGES**

**1 YEAR
GUARANTEE**

All the standard exchange products sold by POTAIN benefit from the same guarantee conditions as the new parts.

Reliability and lifespan of the POTAIN standard motor exchanges are ensured using production techniques which comply with a predefined specifications sheet :

**ISO 9002
QUALITY
certification**

- Systematic, detailed inspection of each component after complete dismantling.
- Insulation control at 1500V, measuring the leakage current and test the winding continuity.
- Boring of the bearings and slipping bleaching.
- Replacement of all bearings by «Europe» bearings
- Grease removal, cleaning, shot blasting, oven drying or rewinding.
- **Systematic exchange of all wearing parts** for genuine spare parts.
- Optimum balancing, degree of quality: G.6,3
- Final inspection **with and without load, on a special test bench**, designed by the manufacturer.
- Two coats of paint (primer + lacquer).

In addition, these motors integrate the most up to date technical aspects

Extract of the operating procedure applied for every motor. Similar procedures are applied for other standard exchange products.
